Bisoma five element acupuncture

David Lee

David Lee Acupuncture Clinic, USA

Bisoma acupuncture introduces a simple, effective, and user-friendly protocol that requires a short amount of the practitioner's time to effectively establish a medical treatment. Only two sets of five acupuncture points, called "transporting horary points," are used. Additional points are optional but generally not necessary. Improvement of the patient's condition has been shown to be immediate and dramatic. Bisoma acupuncture relieves pain for a wide range of acute and chronic health problems that acupuncture is known to treat, such as muscle-joint pain, chemical dependency, anxiety/depression, hot flashes, migraine, neuropathy, and vertigo. In addition, multiple patients can be treated at one time without compromising efficacy. Due to the ease of learning about and implementing Bisoma acupuncture, clinical observation shows it can be utilized to treat anyone, anywhere. Further studies on the use of Bisoma acupuncture should be conducted for the possibility that any person may receive an accessible and effective medical care for their condition.
