Management of newly diagnosed type 2 diabetes mellitus in alternative medicine: A case reports

Niraj Khatri Sapkota

Bishow Pharma, Nepal

Herbal drugs are usually incorporated plant formed mixture in the treatment of diabetes and other disease in Ayurveda and their reported side effects are very less and cost effective. Type 2 diabetes is a condition of insulin insensitivity or the state of resistance of insulin which leads to impairment of glucose utilization. Debix an Ayurved herbal drugs mixture was provided to manage the newly diagnosed diabetes in otherwise healthy 33 years old male with no history of any other disease or medication, on continuous 4 months of treatment plus recommendation to adopt lifestyle modification and 30 minutes of exercise the patient exhibited normal blood glucose report as well as HbA1c was quite improved and finally reached at normal percentage. This sort of data in Ayurveda clinical case study is scarcely reported and published means no report is generally made in scientific way in Ayurveda hence this case presentation will be beneficial to the Ayurveda practitioner.

The rationale of this case report is, basis of treatment in

Ayurveda can be commenced in newly diagnosed diabetes by Debix, a proprietary Ayurvedic medicine manufactured by Sandu Pharmaceutical Pvt.Ltd without any report of side effects under continuous supervision, at least for four months to fully manage the case.
