
CONFERENCE PROCEEDINGS

15th international conference on Transplantation and Medical Surgery March 15-16, 2022

Alicia Lorentz

ABOUT CONFERENCE

Conference series invites all the participants over the globe to take part in "15th International Conference on Transplantation and Medical Surgery" to be held during March 14-15, 2022 at Zurich, Switzerland which cover prompt keynote presentations, Oral talks, Poster presentations and Exhibitions.

Transplantation conference 2022 which organizes Global events regularly is glad to welcome all the interested and enthusiastic participants across the sphere to its prestigious Conference on Medical Surgery and Transplantation which is going to be held during March 14-15, 2022. Transplantation 2022 highlights the theme "Sharing and advance approaches of organ donation and transplantation". Transplantation 2022 provides a wonderful opportunity to share views, exchange knowledge and establish research collaborations & networking. The aim of this conference is to exchange new scientific and clinical information within the field of transplantation bringing together among the transplant surgeons, physicians, scientists, organ procurement personnel, health professionals under a roof.

Why to Attend?

Medical doctors, patients and health care providers consider the Solid organ transplantations save lives in patients laid low with terminal organ failures and improve quality of life. Transplantation is a vital tool to boost the overall health status of the population. Kidney transplantation increases patient continuity over dialysis, and lifesaving transplants are indispensable to treat patients with liver,

heart, or lung irreversible diseases. The proportions of individuals laid low with the disease are expected to extend in future according a recent statistical survey daily, a mean of 79 people receive organ transplants. However, a mean of 21 people dies daily awaiting transplants that can't happen due to the shortage of donated organs. In 2013, 28,954 people received organ transplants. According to recent statistics, Realizing this imperative, OMICS Group is about to arrange Global Surgery and Transplantation Congress this year with a view to reinforce research and promote awareness aiming in developing solutions for the challenges encountered. Transplantation 2022 will comprise of the many leading keynote speakers and session speakers who are going to be delivering their speech on the present research topics of bone marrow transplantation, survival in kidney transplantation, novel hair transplantation methods, and other technologies related to Transplantation and other risk factors associated with the Transplantation. Junior researcher and the student participants will gain the chance to grab the simplest billboard Award by presenting their work as an advert presentation and Young Researcher Forum.

Target Audience

- Transplantation Surgery Students, Scientists
- Transplantation Surgery Researchers
- Transplantation Surgery Faculty
- Medical Colleges
- Transplantation Associations and Societies
- Business Entrepreneurs
- Training Institutes
- Manufacturing Medical Devices Companies.
