

# 17<sup>th</sup> World Congress in the Field of Epidemiology & Public Health

Richard Dobson

Followed by the Successful Completion and to boost young minds and their research abilities by giving an opportunity to meet the experts in the field of Nutrition & Food Sciences. Public Health Summit 2021.

Nutrition is the science that defines the interaction of nutrients and other sense in food in relation to maintenance, growth, reproduction, health and disease of an organism. It consists of food intake, absorption, assimilation, biosynthesis, catabolism and excretion. The diet of an organism is what it eats, which is largely concluded by the availability and palatability of foods. For humans, a healthy diet consists preparation of food and storage methods that keep nutrients from oxidation, heat or leaching, and that reduces risk of foodborne illnesses.

## Why to attend Epidemiology Conference?

Public Health Summit 2021 awaits hundreds of delegates including international keynote lectures and oral presentations by renowned speakers and poster presentations by students, Exhibitions and delegates all around the world which will craft a platform for universal promotion and effective development in this field. It provides international networking and excuses for collaborations with worldwide companies and industries

This global event will be a finest opportunity for the Nutrition and Food Scientists and other professionals. We are assuming around 100+ speakers and over 200 delegates for this esteemed congress.

## Target Audience of Conference:

Our goal is to provide our participants with maximum exposure, and we ensure that the meeting is a mix that involves professionals such as pediatricians, researchers, healthcare professionals, research scientists, educational and industrial diagnostic laboratory professionals, making the Epidemiology 2021 Annual Meeting a great forum.

The meeting was carried out through different sessions, in which the analyses were held on the following major scientific tracks:

The conference will be organized around the Theme 'A Spectrum Of opportunities In the Field of Epidemiology & Public Health'. The aim is to provide an outstanding curriculum covering the entire scope of pediatric science and advancements and sharing the cross-cultural experiences of different treatment methods, inventions and developments.

We welcome all the [healthcare](#) Professionals, Delegates, Researchers, and Students to make your beautiful presence in Tokyo, on January 20-21, 2021. Looking forward to the Epidemiology & Public Health [2021 conference](#)
