

2020 Conference Announcement on 28th International Conference on Cancer Research and Pharmacology

Alexander Birbrair

After a successful completion of the [Cancer Research 2019](#) associated with **Journal of Cancer and Metastasis Research**, organizing committee is putting a step forward to the mesmerizing place Paris, France for our upcoming event “28th International Conference on Cancer Research and Pharmacology” on July 01-02, 2020, Paris, France.

The podium is aiming to attract participants from all around the globe who will gather to speak on the theme “**Conquering Cancer with the Modern Progression**”

A diaspora festooned by eminent personalities from the world of research, academics and industry shaping the further and setting new dimensions in Cancer Research and Pharmacology which laydowns a new pathway for the world. We are diligently working on bringing the most knowledgeable researchers from all over the world, as well as leaders in the industry to explore the important topics on Cancer and Pharmacology. This conference is two full days of technical sessions and poster sessions on cutting edge issues related to the latest

The most common types of cancer being lung cancer causing 1.4 million deaths per year, stomach cancer causing 740,000 deaths, liver cancer causing 700,000 deaths, colorectal cancer causing 610,000 and breast cancer causing 460,000 deaths. This proves invasive cancer to be the leading cause of death in the present century. Treatments that work for some cancers don't work for others and sometimes those treatments simply stop working. Only worldwide research will enhance our understanding of cancer and help us find and develop better, more effective treatments. And only a global search for answers will help us get to grips with this disease. The conference will provide with an exceptional opportunity for the delegates from Universities and Institutes to interact with the world class Scientists and Industry Professionals working in the field of cancer (or) oncology. Children and middle age group individuals are highly prone to cancers like Leukemia (34%), brain tumors (23%) and lymphomas (12%). These are the most occurring types of cancer in middle aged individuals also. Breast cancer prevalent in women ranks second as a cause of cancer death in women

Cancer Research 2020 topics includes Cancer Imaging and Early Detection, Cancer Screening and Diagnosis, Biology of Pediatric and Young Adult Cancer, Radiology and Imaging Technologies, DNA Damage, Mutation and Cancer, Cancer Nanotechnology, Cancer Epidemiology, Oncology Nursing Care, Cancer Nano medicine, Cancer Prevention Vaccines, Ethno pharmacology, Advances in Pharmacological Research, Pediatrics Pharmacology, Drug screening and Discovery, Medical Toxicology Therapeutic Innovation in Pharmacology etc.

Cancer Research 2020 Conference aims in gathering renowned scientists, professors and research professionals, industrialist across the globe under a single roof, where they discuss the research, achievements and advancements in these areas. This meeting will lay a platform for the interaction between experts around the world and aims to accelerate scientific discoveries and major milestones in these areas of Cancer Research and pharmacology.

Cancer Research 2020 Event is expecting more than 200+ Participants to enlighten the program. This time the cancer Research 2020 will organize

several Oral and Poster Presentations/Networking Sessions/Workshops/Symposiums/Exhibition as we have introduced several new tracks to bring in more participants.

We are looking forward for the Cancer Research 2020 to be successful just as the cancer Research 2019 Conference
