
2020 Conference Announcement

Journal of Clinical Genetics and Genomics

2020 Conference Announcement-World Congress on Molecular Biology

Loai Aljerf

The Journal of Clinical Genetics and Genomics places special focus on the underlying cause of inherited diseases and genetic syndromes such as: Fragile-X Syndrome, Thalassemia, Huntington's disease, Cystic fibrosis, Down syndrome, Mitochondrial Disease, Muscular Dystrophy, and Patau Syndrome. Special impetus is placed on studies dealing with molecular approaches in understanding the disease pathogenesis.

Studies involving genomic studies such as: genetic mapping by next generation sequencing techniques, RNA-Sequencing, ChIP-Sequencing, and microarray are highly solicited. Further, studies concerned with diagnostic techniques such as RAPD and RFLP for screening mutations or identifying polymorphisms are also solicited. The scope of the Journal of Clinical Genetics and Genomics also encompasses articles from the fields of neurogenetics, cancer genetics, medical genetics, biochemical genetics, population genetics, genetic epidemiology, and immunogenetics. We would like to take this opportunity to heartfully thank all our Keynote Speakers, Speakers, Delegates, Conference Centre Staff, Organizing Committee, Ad-Sponsors, Media partners, Our participants and everyone else for successfully completing "World Congress on Molecular Biology ". We sincerely appreciate their efforts in supporting our tremendous event.

The World Conference on Molecular Biology 2020 has become the premier platform for the presentation of Molecular Biology and also for unique networking opportunities.

We would be delighted to have you present at the conference to present and hear what the World-renowned scientists, Noble laureates, researchers, experts and scholars have to share about the innovations, advancements and developments, recent technologies and trends in cancer and the impact of cancer and daily lives. We would also love to hear your thoughts and opinions in this direction.

The Majorly Focused Highlights for our Molecular Biology 2020 Conference about Biochemistry, Bioinformatics, Biophysics, Cancer Biology, Cell Biology, Developmental Biology, Enzymology, Gene Regulation, Genetics, Genomics, Microbiology, Neurobiology, Proteomics, RNA Biology, Structural Biology, Virology and many more.

It is our great honour and privilege to welcome you most warmly to our esteemed conference, "World Congress on Molecular Biology " which is to be held on August 31, 2020 - September 01, 2020 in Barcelona, Spain.

This conference is the brainchild of the top Molecular Biology conferences in the world to bring together the best brains for some roundtable discussions on the direction and flow of advanced technology in cancer treatments for the world in the next decade.

The first International Conference last year was successful beyond words. World-renowned scientists, Noble laureates and scholars in their respective fields grace our events as keynote speakers, panel experts, and organizing committee members.

We trust you will go along with us for a concerto of exceptional science and set aside some additional opportunity to value the extraordinary and one of kind marvels of this area.

Once again, we welcome all to gather for the conference. We look forward to your esteemed and confirmed presence at our conference.
