

Announcement on 4th Annual Conference on Hypertension and Cardiovascular Diseases

Abdelmonem Hegazy

Hypertension 2020 welcomes attendees, presenters, and exhibitors from all over the world to London, UK. Hypertension 2020 has been designed in an interdisciplinary manner with a multitude of tracks to choose from every segment and provides you with a unique opportunity to meet up with peers from both industry and academia and establish a scientific network between them. We cordially invite all concerned people to come join us at our event and make it successful by your participation.

4th Annual Conference on Hypertension and Cardiovascular Diseases scheduled on July 05-06, 2021 in London, UK.

Hypertension is a long-term medical condition and very difficult to cure, which means a patient affected by Hypertension have to be on medications for the rest of their life. Thus, the need for Hypertensive drugs tends to increase with the increase in the number of target patients. According to the World Review report 2018, Anti-hypertensive drugs were the second largest therapy area in 2011. By 2020 the hypertensive drugs will post a market value of 32 billion USD. The current percentage of old people worldwide is 11% and it tends to increase to 22% by 2050. Since the growing age is more prone to high blood pressure the need for hypertensive drugs tend only to increase.

CVD market tends to grow slowly from \$129.2 billion in 2015 to \$146.4 billion by 2022 which is a very modest growth rate 1.8%. The old markets which thought for an increase in revenue suddenly dropped of their annual income because of newer markets and expiration of patents for the old target drugs. The new drugs now released in the market are combination drugs and they tend to show high revenue forecast as \$5.7 billion by 2022.

IMPORTANCE AND SCOPE

The current era is where most of the people are often prone to hypertension and allied diseases. These diseases have life-threatening risk factors on people. Thus, care must be taken in order to protect the lives of people suffering from these diseases. In general, Hypertensive people develop the risk for **Cardiovascular Diseases**. Cardiovascular diseases include disease with blood or heart or both. Cardiovascular Diseases will mostly affect all the parts of the body. CVD risks include Chronic heart disease, Rheumatic heart disease, Atherosclerosis, Kidney diseases, Diabetes, etc., Thus finding the right method to treat this is very important. The importance of understanding the blood pressure and heartbeat is necessary since hypertension has no particular symptom until it becomes severe. Combination of drugs to treat Hypertensive Cardiovascular Disease has been intervened to reduce the death rate.

GROWTH OF CARDIOLOGY MARKET

The market for cardiology technologies reached an estimated \$10.2 billion in 2012. According to a new study by Smithers Apex - The Future of Coronary Artery Disease Medical Devices to 2020 - it will grow to \$22.5 billion (€20.9 billion) by 2020, with a year-on-year increase of 9.1%. Demand for coronary artery disease medical devices will grow through 2021 as clinically viable and cost-effective solutions are developed. The report covers three major segments of cardiology surgery, devices and drugs market which includes surgeries, devices and drugs. Cardiovascular diseases are the

number one cause of death globally. Some of the major CVDs include coronary heart diseases, stroke, hypertensive heart diseases, inflammatory heart diseases, rheumatoid heart diseases and others. Coronary heart diseases are the leading cause of death followed by strokes. The prevalence and incidence rate of heart diseases are on a rise; especially in major emerging countries such as India, China and Japan. The market of cardiology surgery, devices and drugs are also on a rise.

Pulsus group is proud to organize the 4th Annual Conference on Hypertension and Cardiovascular Diseases which is scheduled on July 05-06, 2021 London, UK. The conference will be organized around the theme Major Breakthrough in Control of Hypertension and Cardiovascular Diseases.

The conference will feature keynote presentations by top professionals and also by well renowned expert in the field from all around the world. In addition, attendees will enjoy special events and lectures featuring specialists and top scholars. It is a perfect platform for cardiologists, nutritionists, scientists and researchers, doctors and nursing assistants, to exchange their experiences, research findings and all aspects of Hypertension and Cardiology.

The two days conference majorly focusing on the following topics and sessions:

- Structural Cardiac Intervention
- Cardiac Genetic Analyses
- Hypertension in Patients with Comorbidities (Kidney disorder, Brain disorder, etc.)
- Drug Development for patients with Hypertension and CVD
- Cardiac Device Therapy and Cardiovascular Biology
- Molecular Mechanisms of Human Hypertension
- Latest trends in the field of Hypertension and Cardiovascular Diseases many more...

Explore the latest advances in the treatment and management of Hypertension and Cardiovascular Diseases. This is an opportunity to catch up on new developments in this complex area of medicine and strengthening ties and fostering collaboration within the global health community.

We look forward to seeing your presence with active contribution and support to make this event successful once more.

Once again, it's our pleasure to welcome you to our upcoming Hypertension 2020 conference.
