

Awards 2020 of International Conference on Advanced Physics, July 05-06, 2021 | London, UK

Saeed Anwar

Advanced Physics 2020 is pleased to welcome all enthusiastic Pulmonologist, experts, authors and participants from around the globe to the prestigious "World Congress on Physics" at Paris, France on July 01-02, 2020.

Physics is an application-oriented subject that helps people solve their problems from development because engineers solve clearly defined problems. Applied physicists use physics or conduct physical research to develop new technologies or solve engineering problems. Applied physics focuses on technologies that are commonly regarded as a compound in physics. Applied physics is based on fundamental concepts of the physical sciences, but the use of scientific principles in practical devices and systems are really affected. The studies provide researchers with a deep understanding in mathematical and numerical methods of physical processes, theories, and versatile skills. For technological or practical use, [applied physics](#) is used. It is usually seen as a bridge or link between engineering and physics. Applied physics is anchored in the natural science's fundamental truths and concepts. [Advanced Physics](#) provides a golden opportunity to the participants across the various parts of the globe to stage their novel research ideas among the global experts.

Numerous clearly confused things in nature can be comprehended regarding generally basic scientific connections. Physicists attempt to reveal these connections through watching, making numerical models, and testing them by doing tests. The scientific conditions utilized in material science frequently look unmistakably more entangled than they truly are. All things considered, in the event that you are going to contemplate material science, you should get to hold with a specific measure of maths. Present day material science grasps the molecule and its segment parts, relativity and the communication of high speeds, cosmology and space investigation, and mesoscopic [physical science](#), those bits of the universe that fall in size among nanometers and micrometers.

The Organizing Committee of [Advanced Physics 2020](#) along with the support of Various Societies and Media Partner takes the privilege to encourage the Participants and Young Researchers from various parts of the globe to stage their research works among the global experts.

The various categories of presentation available at the Euro Dentistry 2020 are:

- Oral Presentation
- Poster Presentation
- Keynote Talk

- e-poster presentation
- Video Presentation
- Young Reseachers Forum

The various awards to be presented at the event are:

- Young Scientist Award and Research Excellence Award
- Best Keynote Presentation
- Best Poster Presentation
- Research Excellence Award

Young Scientist Award: [Advanced Physics 2020](#) Promotes the design of the Young Scientists Awards to promote achievement in various fields of science and technology Such honours are referred to as "Young Scientist Honours." The creation of the Best Young Scientist Award will be named by the board and, if they wish to print the full-length article, they will be able to publish free of charge in support of the corresponding conference's worldwide journals.

Eligibility: Any scientist, engaged in research work laboratories/institutes, who is not more than 35 years of age, is eligible for the Award.

Criteria: Each scientist must submit their unique research works.

Best Keynote Presentation: Each Speaker will be provided with 40minutes for presenting their research work. The Best Keynote award will be decided by the Scientific and the Organizing Committee.

Eligibility: Any scientist, experienced individual in the field engaged in research work laboratories/institutes is eligible for the Award.

Criteria: Each individual must submit their unique research works.

Best Poster Presentation: A poster is a method of presenting your research to an audience in a visual format. [Advanced Physics 2020](#) offers the unique opportunity to showcase your research in the poster format. Posters will be evaluated based on the following three parameters; those are Presentation Style (5), Research Quality (5) and Layout/Design (5). Best posters will be given an opportunity to publish the full work at discounted processing charges in the supporting international journals. Best poster Award: 3 best posters will be awarded at the closing ceremony of the conference

Criteria: Posters should stimulate discussion, do not give a long presentation. Therefore, keep text to a minimum, emphasize graphics, and make sure every item in your poster is necessary.
