

Blood Research and Hematologic Diseases

Venkata ramana V*

Ramana VV. Blood Research and Hematologic Diseases . J Blood Disord Treat. 2020;3(2):\${pages}.

I inform you to mention that during the year 2019, all issues of volume 2 were published online well within the time and the print issues were also brought out and dispatched within 45 days of publishing the issue online. Journal of Blood Disorders and Treatment is peer-reviewed, open access, scholarly journal aimed at publishing the latest advancements in the field, enriching our understanding of blood disorders such as: Clotting Disorders, Anemias, Hematologic Malignancies, Coagulopathies, Thrombotic Disorders, Hemoglobinopathies, Lympho proliferative Disorders, Plasma Cell Disorders, and Immunologic and Genetic Disorders of the blood. The journal offers a platform for dissemination of information on all aspects of blood-related disorders such as prevention, diagnosis, and management of these disorders.

Anemia is a condition in which you lack enough healthy red blood cells to carry adequate oxygen to your body's tissues. Having anemia can make you feel tired and weak. There are many forms of anemia, each with its own cause. Anemia can be temporary or long term, and it can range from mild to severe.

Hemophilia A, B & C: The Three Different Clotting Factor Deficiencies. The two most common types of hemophilia are factor VIII deficiency (hemophilia A) and factor IX deficiency (hemophilia B, or Christmas disease). Sickle Cell Disease: Sickle cell disease is a group of disorders that affects hemoglobin, the molecule in red blood cells that delivers oxygen to cells throughout the body. People with this disorder have atypical hemoglobin molecules called hemoglobin S, which can distort red blood cells into a sickle, or crescent, shape.

Radiation therapy or radiotherapy, often abbreviated RT, RTx, or XRT, is a therapy using ionizing radiation, generally as part of cancer treatment to

control or kill malignant cells and normally delivered by a linear accelerator Leukemia, Lymphoma, Myeloma, Von Willebrand Disease, Autoimmune Lympho proliferative Syndrome, and Deep Vein Thrombosis. Special emphasis is placed on the treatment and management strategies such as: Thrombolytics, Thrombectomy, Blood Transfusion, Stem Cell Transplantation, Artificial Cells, Blood Substitutes, Recombinant Clotting Factors, Gene Therapy, and Chemo and. We develop this journal for awareness and to help many peoples and students about typical types of blood disorders and symptoms and how to diagnose these disorders. Now Blood Disorders is one of the major things in our study life and research life because it plays a major role in our life.

From the Google analytics, More than 2,755 readers are visiting our journal website for submitting their manuscripts or papers or research work. Most of the papers are from United States of America, India, where blood diseases and Health related research is more. Now this journal is at the stage of volume 3 issue 1 for publishing papers. The submitted papers will be 21 day rapid review process with international peer-review standards. The Timeline of processing from Submission to Publication is 45 days. Manuscript will be published within 7days of acceptance.

The social media can play a key role in spreading the research work increased visibility, citation and ultimately the impact of published works. We promote published articles to the social media. This will benefit the researcher to increase reputation and attendant career progression. For example, the Face book account, Twitter, LinkedIn and Instagram.

I would like to express our gratefulness to the authors of articles published during the past years, and to acknowledge generous help which both the authors and editors obtained from the peer-reviewers.
