

“Color” for Kids

Samuel A Nigro

“Color” needs to be retired as relevant. Kids need to know so they do not repeat what has happened. In fact, you are not black and you are not white, and neither are most others except rarely. In fact, skin science identifies at least 25 different skin colors...“black” and “white” are the fewest number of people and the rarest colors. All who call or consider someone by color, must be factual and use the correct color, but you cannot correctly use “black” or “white” 95% of the time, so color should be ignored any way, because it is most likely wrong and not one of the true 25 skin colors...So, as a matter of fact, skin color does not mean anything any way unless made into countercultural war cries or poor-me-begging.

Color is determined by amount of melanin in your skin. The darkest person has less than 3/4 of a MILLIGRAM of melanin in his body. Thus, color is skin-deep and irrelevant as much as eye color, hair length, foot size, waist size, fingernail length or other body dimensions when relating to others-Less than 3/4 milligram of skin-deep melanin in every person should not rule you, your body and the world. Judgements and actions should not be determined by body dimensions including color. Thus, the about 1/2 milligram of skin-deep melanin should not replace one’s 3 1/2 pounds of brain and its content-of-character. The amount of melanin in anyone’s body is about the amount of sand one picks up by a moist forefinger tip dipped into sand. So, forget about color or race but use full human beingness as determining behavior.

Today, using “black” by Negroes has become the same as old Caucasian slavers used “white.” “Black” was never applied to people until the current racist black-cult started it in the 1960s. “Negros” was the word for 500 years for those of African origin; they did not call themselves black nor did any one else. Africans themselves always identified themselves by their tribal names, and still do.

The extermination of “Negro” is a historical and sociological outrage because intelligent virtuous Negroes were responsible for influencing Caucasians and all to implement full human beingness as content-of-character, made possible because the Founders rejected slavery (The “1619” stories of the New York Times are arrogant counter-productive victimize manipulations). During the 500 years of so-named, “Negros” led and helped influence Caucasians to free slaves every where and to promote equality of opportunity such that today at least 85% of all cultural groups of any color composition are successful in the United States

including achieving millionaire status. To exterminate “Negros” is wrong-they never called themselves “black” although the black racist cult of today has dishonestly redacted writings often inserting “black” for “Negro.” Dr. Martin Luther King, Jr. objected to the change to “black.”

Moreso, Negroes-Caucasians working together positively without color consideration has been censored and overlooked by those intoxicated into victimize by color-The successes of Negroes and all cultures is not perfect but it is amazing and only happened in America because of the Constitution and the Declaration of Independence-Slavery elsewhere was extermination-Islam murdered their 14 million slaves over 12 centuries (There was no NAACP any where but America where millions of whites died winning the Civil War freeing 4 million slaves giving today’s 45 million Negro descendants, most of whom are doing well because of the Jewish-Christian-Caucasian creation of most everything worthwhile from freedom to printing to cars to cellphones to “you name it”. How victimists censor and ignore Islam’s extermination of 14 million Negroes during 12 centuries of slavery is totally discrediting and academically false.

Still, unfortunately, every group has up to 15 % family failures which result in unsuccessful self-development, and, instead, most counter-productively adopt victimism as their way of life. Victimism is the real cause of continued unsuccesses in every cultural group. To correct this, they need to get their family childhoods improved like those successful in their culture. So they should stop blaming everyone else and correct their childhoods which are so bad that by age 11, their children start drugs to escape their miserable family life-and color has nothing to do with it except as excuse-making blaming-others for their failures, when, instead, they should look in the mirror, thank Caucasians for all they have and ask for continued unity in human beingness for mutual growth and development. They also ought to learn how to peacefully interact with police which seems to be the most flagrant reason for violence by police and legitimate authority.

Color needs to be retired as irrelevant. It just makes matters worse-always did and always will. Content-of-character judging will promote truth, oneness, good and beauty.
