

# Conference Announcement: 4<sup>th</sup> International Conference on Chronic Diseases

Prof. Giulio Tarro

---

**Chronic diseases** is an enormous field that typically integrate with the human health condition or disease that is persistent or otherwise long-lasting in its effects. The focal point of Pathology is the enlightening the behaviour of distinct microorganisms and pathogens that are in nature and to discover the prevention, diagnosis and treatment of existing and arriving diseases caused by hazardous microbes.

In association with the [Journal of Pathobiology and Physiology](#), we the team of this convention would be happy to thank all the past participants and supporting team.

All the Attendees of our previous series of this conference have obtained the advance technical particulars in the area of treatment of microbial infections that they were aspiring, and that their role in the field has been enhanced via their participation in this esteemed conference. They were able to take part in all the sessions and grab the advantage of the advancements in Pathology that researchers are working with. The majorly focused Highlights for our Conference were Chronic diseases, Diseases caused by microbes, Fungal infection and diseases, Applied and Environmental Microbiology, Diagnosis and treatment of microbial infections and etc.

Next conference in the Chronic diseases series is approaching in Paris, France!

We are glad to announce the initiation of the next edition “**4<sup>th</sup> International Conference on Chronic Diseases**” in **February 17-18, 2020** in **Paris, France** which revolves around the theme of “Health Promotion and Disease Prevention”.

We look forward to you all sharing your incredible knowledge, research ideas and to make a sprinkle with new improvements at this intercontinental event in France. Having you all with us for our International conference is a matter of great pleasure.

This time we have introduced some new highlights for our International Conference on **Chronic Diseases** such as Chronic Respiratory Diseases, Chronic Osteoarticular Diseases, Parasitology, Chronic Fatigue Syndrome, Diabetology & Metabolic Diseases, Environmental Microbiology, Diseases caused by Microbes, Infectious Diseases and etc.

This convention is designed in such a way to attract people around the globe from both industry and academia that helps to create a scientific network between them. This event will bring together Professors, Students from academia and researchers in the field of Microbiology, Pharmaceutical Microbiologist and Researchers in life sciences to push forward the Microbiology and Research.

We cordially invite all concerned people to Paris, France from academic research as well as from industries to come and join us at our esteemed convention and make it a successful event by your valuable presence. We heartily welcome all the Microbiology Professionals, Delegates, Researchers, and Students to make your worthy presence in Paris, France on February 17-18, 2020.

The growth of market in the field of is increasing day by day. Immunomodulators are an effective way to treat infectious diseases like AIDS, where the patient’s **immune system** is boosted and resist against the pathogens are acquired. It is estimated that the global immunology market with grow at a steady CAGR of about 5% by 2022. According to the World Health Organization, chronic disease prevalence is expected to rise more than 56% by the year 2020.
