

Conference Announcement on Microbiology

We are pleased to welcome you to the “International Conference on Clinical Microbiology and Parasitology” after the successful completion of the series of Microbiology Congress. The congress is scheduled to take place in the beautiful city of London, UK on Jul 22-23, 2020. This Advanced Microbiology 2020 conference will provide you with an exemplary research experience and huge ideas. The perspective of the Microbiology conference is to set up research to help people understand how techniques have advanced in the field of Microbiology and how the field has developed in recent years. Longdom Conferences extends immense pleasure and honour by inviting you to attend the Webinar on “Clinical Microbiology and Parasitology” scheduled during July 22 2020. Advanced Microbiology 2020 will be focusing on the theme “Progressing research Trends in Clinical Microbiology” to enhance and explore knowledge among academicians and industry personnel. Advanced Microbiology 2020 will be having sessions on, microbiology, infectious diseases, pharmaceutical microbiology, environmental microbiology, medical microbiology and its related subjects to establish a connection for exchanging ideas. Detailed agenda of Advanced Microbiology 2020 will have keynote presentations, plenary sessions, oral sessions, panel discussion, posters presentations, workshops, symposia, and young researchers’ forum. Microbiology conference devoted to publishing reports on prokaryotic and eukaryotic microorganisms such as yeasts, fungi, bacteria, archaea, and protozoa. Research on interactions between pathogenic microorganisms and their environment or hosts are also covered. Global Summit on Clinical Microbiology and Parasitology will become the leading platform in bringing together all experts and beginners for a friendly and effective research-oriented discussion. The goal of Longdom conferences is to bring together scientists at every level from diverse disciplines to understand and discuss throughout the programmed sessions and comfortable gatherings. All these opportunities will support the professional growth of younger scientists that will promote future collaborations and enhance participation and contribution to their exciting research work. Bacteriology is the conventional branch of Microbiology, which focuses on basic microbiology, host-pathogen interactions, biochemistry, molecular biology and mechanisms, ecology and epidemiology of bacteria. Parasitology is a closest relative of Medical Microbiology that encompasses the parasite world ranging from protozoans to helminthes. The Journal of Bacteriology & Parasitology is specialist journal, which is known for its state-of-the-art presentation of the latest discoveries in Bacteriology and Parasitology.

Note: This work is partly presented at Webinar on Clinical Pharmacy, going to be held on May 31st, 2021 GMT+1.
