

Editorial Highlights for Current: Research Cardiology

Suresh Babu G*

Suresh Babu G. Editorial Highlights for Current: Research Cardiology. *Curr Res Cardiol.* 2020;7(2):1-1.

Current Research: Cardiology with the ISSN NO: 2368-0512 is the one of the most preferred and highly accessed journal for the publishers in the field of cardiology. It is our pleasure to announce that journal published Volume 6 with 4 quality regular in the year 2019. During this year the journal bought out with huge number of conference proceedings on 5th World Congress on Cardiology and Cardiovascular Diseases, 4th Annual Conference on Hypertension and Cardiovascular Diseases, Global Meet on Cardiology and Cardiac Surgery, Hypertension 2020, Global Meet on Cardiology and Cardiac Surgery and Vascular Congress 2020.

The Journal is indexed in CNKI, Open J-Gate and many other reputed scientific databases. Most of the cases members of the editorial board also prefer to submit their articles. Such practice is common in other reputed specialty Journals. In fact, Current Research: Cardiology encourages editorial board members to actively contribute. However, no special privileges are given to anyone. All scientific manuscripts including editorials are subjected to peer review. Follows a double blind peer review process where identity of authors and reviewers is not revealed to each other. The review generally involves two to six subject experts. The editorial team

consisting of associate editors and assistant editors are involved in the entire article cycle starting from submission to final recommendation. The entire review process is carefully structured so as to minimize possibility of bias.

Upcoming volume 7 in 2020 journal is mostly focusing on critical topics of Cardiology like hypertension, diabetes mellitus, cardiovascular, acute myocardial injury, myocarditis, arrhythmias, venous thromboembolism, COVID-19. As the global cardiac stroke rate is increased mainly due to Hypertension, Diabetes are key factors for many cardiac issues. We invite scholars, academicians, researchers and industry experts around the global to contribute their scholarly literature findings, review studies or paper, white paper, case studies and research articles on cardiology.

In association with Pulsus group has increased Readership Metrics (By Google Analytics) of Current Research: Cardiology which can be accessed at Google Analytics Metrics for the Current Research: Cardiology

I would also like to express my gratitude to all the authors, reviewers, the publisher, the advisory and the editorial board, the office bearers for their support in bringing out yet another volume of Current Research: Cardiology and look forward to their unrelenting support to bring out the Volume 7 of Current Research: Cardiology in scheduled time.
