

Editorial Note for Surgery: Case Reports Journal

Anukriti Srivastava*

Srivastava A. Editorial Note for Surgery: Case Reports Journal. Surg Case Rep 2020;4:1.

Without continual growth and progress, such words as improvement, achievement, and success have no meaning. Founded by Prof. Dr. Ana María Minaya Bravo (Madrid, Spain) Surgery: Case Report is growing continuously. It is our pleasure to announce that during year 2019, all issues of volume 3 were published online on time and the print issues were also brought out and dispatched within 30 days of publishing the issue online.

Surgery: Case Report during this year also brought out World Congress on Otolaryngology - Head and Neck Surgery and Medical Summit and Expo on Surgery and Anaesthesia and International Conference on Physicians and Surgeons, which consisted of ~ 50 abstracts.

Surgery: Case Reports publishes case reports in all areas of surgery. Case reports must be authentic, understandable, educational and clinically interesting to an international audience of surgeons, trainees and researchers in all surgical subspecialties, as well as clinicians in related fields. This OPEN ACCESS peer review journal publishes original articles, reviews, case reports in the fields of gastroenterological surgery, cardiovascular surgery, thoracic surgery, breast and endocrine surgery,

pediatric surgery, transplant surgery, and emergency surgery.

The purpose of the journal is to contribute to the progress of surgery by providing clinicians and researchers with an educational forum in which to disseminate their personal experience and novel treatments to a wide readership and by reviewing interesting, rare cases encountered by colleagues all over the world, from whom contributions are welcomed. Each lead author of a published article receives a paper copy of the Journal in which his/her article was published.

I take this opportunity to acknowledge the contribution of Editorial Boards: Philippe Metellus, Honorio Fabrizio Cardin, Lorenzo Dioscoridi during the final editing of articles published and the support rendered by the editorial assistants: Sue Chhay, Eleftherios Pelechas and Eduardo Esteban Zubero in bringing out issues of PULSCR in time. I would also like to express my gratitude to all the authors, reviewers, the publisher, the advisory and the editorial board of PULSCR, the office bearers for their support in bringing out yet another volume of PULSCR and look forward to their unrelenting support to bring out the Volume 4 of PULSCR in scheduled time.

General Surgery Assistant, Notre Dame de Grace Clinic, Catholic University of Louvain, Gosselies, Belgium
