

Emerging the Field of Anesthesia and its Case Reports

Steven J. Fowler*

ABSTRACT: Anesthesiology, anaesthesiology, anaesthesia or anaesthetics is the medical speciality study concerned with the total perioperative care of patients before, during and after surgery. Anesthesiology is the unique

branch of medical and clinical sciences where we can expand this field worldwide.

Key Words: *Anesthesiology, Anaesthesia, Perioperative care*

INTRODUCTION

Anesthesiology, anaesthesiology, anaesthesia or anaesthetics is the medical speciality study concerned with the total perioperative care of patients before, during and after surgery. Anesthesiology is the unique branch of medical and clinical sciences where we can expand this field worldwide.

On behalf of the Board of the Anesthesiology Case Reports and my co-editors, I am glad to present the Volume 3, Issue 1 of the journal. The journal established in the year 2018 has now published 6 issues; 2 issues in a year. Average download per article is increasing and on an average there are 20 downloads per paper. All these are promising signs. We could reach this stage through the constant support of Board Members and intellectual generosity of the readers and contributors (authors and reviewers).

We also feel that a need exists for additional facilities for the publication of the results in anesthesia and anesthesiology research, especially in their relation to medical and clinical sciences.

Therefore, it has been resolved that papers on these topics will be welcome in our Journal; and in order to accentuate the importance we attribute to the cultivation of Anesthesia and Analgesia. Anesthesiology Case Reports is a peer-reviewed journal in which helps in uplifting the different case reports, research studies in the field of anesthesia. Our journal contributes various case reports, case studies, research work throughout the global wise. Our journal is the perfect platform to showcase the different types of case reports all over the world as we encourage every doctor, eminent authors, students, graduates etc., from any part of the world.

The journal covers the relevant topics like anesthesia, anesthesiology, analgesia, drug design, types of anesthesia etc. The current volume 3 Issue 1 various aspects in the field of anesthesia were explained by different authors. In the Research article by Rabesalama Fanojomaharavo T et al discussed about Ultrasound Guided Axillary Block for Upper Limb Surgery, Rural Experience [1].

Dr. Shweta Joshi discussed a case report about Anesthetic Challenges in Management of Parturient with Congenitally Corrected Transposition of Great Arteries Complicated with Complete Heart Block and Hypothyroidism for Elective Cesarean Section [2].

Sam Curtis discussed a case report regarding A Rare Case of Posterior Uterine Wall Rupture Complicated by Massive Transfusion and Disseminated Intravascular Coagulation [3].

Steven J. Fowler discussed about Anesthesia and Critical Care Outbreaks the Innovations in the Field of Anesthesiology [4].

In Volume 3, Issue 2 Reena R Kadni discussed about a case report Double edged sword cardiac side effect of Ondansetron [5].

As per the above case reports and research articles discussed by various authors from different parts of the world we successfully released 2 issues in volume 3. Now, we are going to release an Issue 3 in the volume 3. With the support of the eminent authors around the world, we our editorial members decided to increase 2 more Issues in this current volume 3.

As always, we would like to thank our steadfast faculty advisors. Their guidance and support make our journal possible, and we are deeply indebted to them for the time and effort that they put into our journal. On a final note, the outgoing board would like to send its best wishes to next year's new board members. We hope that the incoming board will strive to honor the efforts of the past ten years and pass down the work ethic and appreciation of academic scholarship to future PULACR members.
