EDITORIAL NOTE

The COVID-19, pandemic has stalled the whole world wreaking the deadly viral havoc across the globe, shackling the entire healthcare system.

The dreadful deadly corona virus and its mutant has killed more than 10 lakh people globally and the spread and deaths are in continuation.

In this unprecedented pandemic era's uncertainty, the nurses, healthcare practitioners have emerged as frontline warriors against the deadly virus.

Healthcare staff has stood up and facing the health emergency providing and delivering care in these critical times.

The untreatable COVID virus has threaten the whole humanity's existence, meanwhile the invention of vaccines by scientific community has provided some assistance in immunizing the individuals against corona.

To tackle and slowdown the spread of virus and break the chain of corona spread, WHO has given approval for the emergency use of under trial vaccines to vaccinate and immunize the individuals resisting the potency of virus.

The governments of different nations have prioritized immunizing the frontline health workers against the deadly virus.
