EDITORIAL

Critical consideration viewers can be discovered working in a wide assortment of situations. Critical care nursing may be a specialty targeted on the care of unstable, inveterately unwell or post-surgical patients and people in danger from severe diseases and injuries.

Public health nurses comprise the largest professional part in public health and are involved in the prevention, education and evaluation of Public Health.

They play a vital role in the prevention of disease and help to promote community health and safety.

It work by administering medication, educating and counseling patients and their families on diagnosis and treatments, assessing and monitoring a patient's essential health signs.

Different nursing specialties, a profession in critical care nursing needs to have knowledge of human anatomy and physiology, sharp clinical assessment skills.

Critical care nurses are responsible to master emergency procedure techniques and therefore the use of life-saving instrumentality like cardioverters, inhalers, nebulizers and mechanical ventilation.

It includes health promotion, disease prevention, and care for the sick, disabled, and dying.

Most nurses care for only one patient at a time, whereas public health nurses care for entire populations. The capability to work with communities allows public health nurses to help in educating the community about health issues and to improve their health, safety and facilitate access to care themselves.

Emergency Nursing is a field in which nurses care for patients in case of emergency phase of their illness or injuries and are adapted to life-threatening problems. They rapidly and effectively carry out life saving measures and other treatment, acting with a high degree of liberty and ability to provide needed measures without direction and educating the patients their families with the information and support needed for them. Emergency nurses and other emergency medical professionals, are preferred to work in fast-paced and also in often stressful environments.
