

# International Conference on Physical Medicine and Rehabilitation

Obeid Al Rashoud

## Announcement

Pulsus group has completed many successful conferences in the previous years so here pulsus announcing a new series physical medicine congress to discuss their ideas and knowledge on the various topics. Pulsus group introducing the commencement of International congress on Physical Medicine and Rehabilitation on **September 07-08, 2020** at Toronto, Canada. The congress focus on the theme "Accentuating the betterment for surveillance" we have 20+ scientific tracks and 130+ abstracts so the following scientific tracks: Physiotherapy, Cardiac Rehabilitation, Pediatric rehabilitation medicine, Sports medicine, Geriatric medicine, Neurological Rehabilitation, Therapeutic massage, Mental Rehabilitation, Traumatic Brain injury, Medicinal therapy, Stroke rehabilitation, Neuromuscular medicine, Cerebral palsy rehabilitation, and hospice and palliative medicine.

Physical medicine and rehabilitation, also known as physiatry and physiatrist is a branch of medicine that aims to accentuate and rehabilitate functional ability and quality of life to those with physical disablement or disorder. A physician having completed training in this field called as physiatrist. Physiatrists specialize in restoring optimal function to people with illness to the muscles, bones, ligaments, or nervous system. Physiotherapy assists people to address disability or injury to restore the movement of their daily life. The diagnosis depends on wound care and ECG will improve the patient physical functions. In the nineteenth century they did treatment through manual therapy, ultrasound, low-level laser, exercise. In current days, for the betterment of people, the advanced technologies had invented the McKenzie method, kinetic control, and hypo pressive training. Physical medicine is improved by their studies and ideas of various people from all over the globe.
