

Global Summit on Advances in Pediatrics and Pediatric Neurology

Markku Heikinheimo

Market Analysis

Geographically, the [Pediatric Neurology](#) market has been divided into North America, Europe, Asia Pacific, Latin America, and Middle East & Africa. North America is anticipated to account for the highest share of the pediatric neurology market during the forecast period. The U.S. dominates the pediatric neurology market with a significant market share. About 2.7 million people in the U.S. have epilepsy and more than 45,000 new cases are diagnosed every year, followed by the U.K, Europe and Asia Pacific. The market in Asia Pacific is projected to expand at a significant rate during the forecast period. Globally, market players such as Medtronic, Elana Inc. Courtagen, Ethicon, Nemours, and Inova Health System involved in the pediatric neurology treatment and services have implemented new strategies and technological advancements.

New launch of pediatric neurology devices worldwide is projected to drive the growth of the market. The pediatric neurology market comprises few medical devices such as EEG (electroencephalogram) and brain stimulation devices, which are used in the diagnosis and treatment of pediatric neurological disorders. There are various therapies available for the treatment of pediatric neurological disorders such as intrathecal drug therapies, lumbar puncture therapies, and pediatric neurological evaluations.

Currently, there is growing extensive research and development with a significant number of new product introduction in the market. This caters to the increasing patient demand for efficient and effective treatment modality.

Target Audience

- Pediatric Scientists
- [Pediatric Neurologists](#)
- Occupational Therapists
- Physical Therapists
- Pediatric Nurses
- Pediatric Faculty
- Students
- Pediatric Physicians
- Manufacturing Medical Devices Companies.
- Users of Pediatric tools and services.
- Providers of Pediatric tools and services
- Directors/Managers/CEO's
- Presidents & Vice Presidents

- Brand Manufacturers/ Marketers of Consumer Products
- Marketing, Advertising and Promotion Agency Executives

Who should attend?

Pharmaceutical Companies & Manufacturing Companies

Research Institutes and members

Business Entrepreneurs

Why to attend?

The people all over the world should be focused on learning about Pediatrics and Pediatric Neurology and its forwards in making a better neonatal health; this is going to be a best opportunity to influence the largest assemblage of participants from the Pediatrics community. Conduct presentations, distribute information, meet with current and potential scientists, make a splash with new drug developments, and receive name recognition at this 2-day event. World-renowned speakers, the most recent techniques, developments, and the newest updates in Pediatrics are hallmarks of this conference.

Why Paris?

[Paris](#) is the capital and most populous city of France. Paris is located in northern central France, in a north-bending arc of the river Seine whose crest includes two islands, the Île Saint-Louis and the larger Île de la Cité, which form the oldest part of the city. Paris has a typical Western European oceanic climate which is affected by the North Atlantic Current. The overall climate throughout the year is mild and moderately wet. Paris has been one of Europe's major centres of finance, diplomacy, commerce, fashion, science, as well as the arts. The centre of Paris contains the most visited monuments in the city, including the Notre Dame Cathedral and the Louvre as well as the Sainte-Chapelle. Les Invalides, where the tomb of Napoleon is located, and the Eiffel Tower are located on the Left Bank south-west of the centre. For centuries, Paris has attracted artists from around the world, who arrive in the city to educate themselves and to seek inspiration from its vast pool of artistic resources and galleries. As a result, Paris has acquired a reputation as the "City of Art". Italian artists were a profound influence on the development of art in Paris in the 16th and 17th centuries, particularly in sculpture and reliefs. Painting and sculpture became the pride of the French monarchy and the French royal family commissioned many Parisian artists to adorn their palaces during the French Baroque and Classicism era.
