

Non surgical Rhinoplasty with HA-fillers and PDO collagen stimulated barbed and smooth methothreads

Galyna Khrushch

Peoples Friendship University, Russia

Abstract:

The non surgical Rhinoplasty is one of the most recommended and affective procedures for ingactible aesthetic corrections. Non surgical rhinoplasty reserved correction of the post-surjical impertections such as camouflage after surgical rhinoplasty after trauma or for improving the shape of the nose. With combining some fillers and PDO collagen stimulated threads we are able to do this by placing smooth and barbed threads .
