

Recent Advances in Biochemistry

Jamshidkhan Chamani*

Journal of Biomolecules and Biochemistry (PULJBB) is an international, Open Access, and peer reviewed journal that publishes scientific articles related to the Biomolecules and Biochemistry.

Journal of Biomolecules and Biochemistry is having an outstanding Editorial Board of international researchers. During this year we look forward to taking some initiatives that would encourage and reward our prospective audience which include clinicians, research scientists, decision-makers and a range of professionals in the healthcare community.

Journal of Biomolecules and Biochemistry is an open access, peer-reviewed journal that focuses on all aspects of Biomolecules and Biochemistry. Celebrating a successful publication history, PULJBB solicits research contributions pertaining to chemical, physical, mechanistic, and structural basis of biological or cell function, lipids, phospholipids, glycolipids, sterols, glycerolipids, carbohydrates, sugars, vitamins, hormones, neurotransmitters, metabolites, amino acids, nucleotides, monosaccharides, peptides, oligopeptides, polypeptides, proteins, nucleic acids, DNA, RNA, oligosaccharides, polysaccharides, glycoprotein, glycoconjugate, proteoglycan, cellulose, lignin and haemoglobin, and encompasses the fields of chemical biology, synthetic biology, disease biology, cell biology, nucleic acid biology, neuroscience, structural biology and biophysics.

Prospective academicians and scientists are encouraged to utilize this opportunity to get their articles reviewed, processed and published at relatively faster pace and at lower charges. In addition to this the authors who publish with us during the year-long celebrations will also be eligible for academic awards recommended by the editorial panel.

The journal invites different types of articles including original research article, review articles, short note communications, case reports, Editorials, letters to the Editors and expert opinions & commentaries from different regions for publication.

A standard editorial manager system is utilized for manuscript submission, review, editorial processing and tracking which can be securely accessed by the authors, reviewers and editors for monitoring and tracking the article processing. After submission, an acknowledgement with manuscript number is sent to the corresponding author within 7 working days. A 21 day window time frame is allotted for peer-review process wherein multiple experts are contacted. Author proof is generated within 7 working days after the acceptance decision.

Manuscripts will be sent to at least two referees for evaluation. The journal always attempts to minimize the potential for conflict of interest in the reviewing of manuscripts and, therefore, authors may request any individuals with possible conflict of interest not to be involved in the reviewing of their manuscript. Authors may provide the names and addresses of a few potential reviewers. The journal encourages authors to nominate Editor(s) and/or Associate Editor(s) that handles the manuscript. The Editors and Associate Editors will be guided, but not necessarily bound by these suggestions.

Permanent free access to your article upon publication ensures extensive global reach and readership. Our open access enables you to share your article directly with colleagues through email and on social media via a single link, permitting third party reuse with appropriate citation in addition to the retention of content copyright by the author. Through promotion in a targeted global email announcement or press release, your article will be seen by thousands of the top-most thought-leaders in your field. In a world of black & white journal articles, high-quality full-color images make your article stand out from the crowd and tell a complete story, increasing readers and citations. Extended reach for your article through links on Twitter accounts provides maximum visibility worldwide. Distribute your work to colleagues and at conferences as we provide hard copy color reprints of your article on order.
